INTRODUCTION

This is a report on a survey of attitudes toward legalized gambling among Montana residents, conducted by the Gallup Organization, Inc. for the Montana Board of Crime Control. The survey determined the extent to which residents favored legalized gambling and the forms of gambling which meet with their approval. Attitudes toward the manner in which gambling regulations should be enforced was also explored. Residents' perceptions of the changes which might occur as a result of legalized gambling were examined. Finally, Montana residents' concern for problems facing the state and their attitude toward related issues was also measured.

METHOD:

Personal interviews were conducted with a representative sample of Montana residents age 18 years and older. A total of 1103 adult men and women were questioned during September, 1973. The actual questions asked are shown on the following pages. The composition of the sample, a description of the sampling procedure used and tables of recommended sampling tolerances will be found in the technical appendix.

THE QUESTIONS ASKED WERE:

ALL RESPONDENTS WERE ASKED:

1. *In your opinion what is the MOST important problem facing this state today?*

2. *And what do you consider to be the next most important problem facing this state today?*

3. *In general, how would you rate the overall moral climate of Montana -- very high, fairly high, fairly low or very low?*

4. *Which 3 of the following problems do you think should receive the greatest attention by the Montana State government in the near future?*
RESPONDENTS WERE SHOWN THE FOLLOWING CARD:

Welfare/relief	High taxes
Prostitution	Educational needs
Prison reform	Drug abuse
Poverty	Degeneration of the family
Pornography	Crime and lawlessness
Pollution (air/water)	Corruption in government
Inflation	Alcoholism

5. *Thinking about 5 years from now, which of these problems, if any, do you think will be most critical or more of a problem than they are now in Montana?*
RESPONDENTS RETAINED CARD SHOWN IN QUESTION 4.

6. *And which, if any, do you feel will be less of a problem in Montana, than they are now?* RESPONDENTS RETAINED CARD SHOWN IN QUESTION 4.

7. *On a different topic . . . How much respect do you have for law enforcement in this community - a great deal, some, hardly any or none?*

8. *In the election in November of 1972, there was a public referendum on legalizing gambling in Montana. Did you vote FOR or AGAINST legalizing gambling, or did things come up which prevented you from voting in that election?*

RESPONDENTS WHO "DIDN'T VOTE" OR "CAN'T RECALL" (QUESTION 8) WERE ASKED:

9. *Well, would you say that you are FOR or AGAINST legalizing gambling here in Montana?*

ALL RESPONDENTS WERE ASKED:

10. *Why are you for/against legalizing gambling in Montana?*

11. *As you may know, the voters last November gave the Montana State Legislature the right to legalize gambling. There are, of course, a number of different types of gambling. I would like your opinion as to which you would like to see here in Montana. As I read each type, tell me if you would approve or disapprove of it.* RESPONDENTS WERE READ THE FOLLOWING LIST OF VARIOUS TYPES OF GAMBLING. (SHOWN ON THE FOLLOWING PAGE)

Bingo
Raffles
Punch boards
Off track betting
Dog racing
Jai Lai
Betting on sports events
Dice games (craps)
Slot machines
Pin-ball machines
Poker clubs
Casino gambling

12. *For each of the forms of gambling that you said you would approve of, I'd like to get your opinion about who, or what type of organization should be allowed to operate this type of gambling.* RESPONDENTS WERE SHOWN THE FOLLOWING LIST:

Churches, civic clubs, fraternal lodges
Bars or taverns
Special events such as fairs, rodeos, etc.
Casinos or specially licensed gambling places
Other commercial businesses (laundromats, gas stations, grocery stores, etc.)

13. *If gambling were legalized here in Montana, what kind of licensing and enforcement would you like to see over the gambling operation?* RESPONDENTS WERE SHOWN THE FOLLOWING LIST:

County government licensing and enforcing
State government licensing and enforcing
Some combination of the above
No formal controls

14. *If gambling were legalized here in Montana, do you think it would be a good idea to create a new agency, such as a State Gambling Commission to inspect and enforce the law, or do you think some existing State Agency should regulate gambling?*

RESPONDENTS ANSWERING "EXISTING AGENCY" (Q. 14) WERE ASKED:

15. *Which of the state agencies listed on this card do you think should handle the regulation of gambling?* RESPONDENTS WERE SHOWN THE FOLLOWING LIST:

Board of Crime Control
Department of Social and Rehabilitative Services
Department of Revenue
Department of Public Services Regulation
Department of Professional and Occupational Licensing
Department of Labor and Industry
Environmental Quality Control
Department of Education
Department of Business Regulation
Attorney General - Department of Justice

ALL RESPONDENTS WERE ASKED:

16. *Again, if gambling were to be legalized here in Montana, how do you think it should be licensed? Would you like to see a strict licensing policy that would restrict gambling to certain locations, certain times, certain sizes of the gambling operations, etc. or do you think it would be better if there were not too many licensing regulations?*

17. *Would you favor or oppose establishing a legal age for a person to be allowed to gamble, or not?*

RESPONDENTS ANSWERING "YES" IN QUESTION 17 WERE ASKED:

18. *In your opinion, what age should that be?*

ALL RESPONDENTS WERE ASKED:

19. *In your opinion, is there any other restriction, or restrictions, that might be put on persons, if gambling were legalized here?*

20. *If all forms of gambling were to be legalized here in Montana, the state may collect revenue from the gambling operations. How would you like to see this revenue spent?* RESPONDENTS WERE SHOWN THE FOLLOWING LIST:

    1. Return the money to local municipalities for their own use
    2. To increase or provide additional funding for compensation for innocent victims of crimes
    3. To increase or provide additional funding for welfare and relief
    4. To increase or provide additional funding for alcohol or drug abuse programs
    5. To increase or provide additional funding for education
    6. To reduce taxes

RESPONDENTS MENTIONING CATEGORY 6 IN QUESTION 20 WERE ASKED:

21. *If it were not possible to use these revenues to reduce taxes, which ONE of these other alternatives would you prefer?* RESPONDENTS WERE SHOWN THE FOLLOWING LIST:

    Return the money to local municipalities for their own use

    To increase or provide additional funding for compensation for innocent victims of crimes

    To increase or provide additional funding for welfare and relief

    To increase or provide additional funding for alcohol or drug abuse programs

    To increase or provide additional funding for education

ALL RESPONDENTS WERE ASKED:

22. *If all forms of gambling were legalized here, in Montana, in what ways, if any, do you feel it would change this state?*

RESPONDENTS MENTIONING ANY CHANGES WERE ASKED:

23. *All things considered, do you think these changes would be good for the state or not good for the state?*

ALL RESPONDENTS WERE ASKED:

24. *I am going to read a number of statements about how Montana might change if all forms of gambling were legalized. Some you may agree with and others you may disagree with. For each, tell me if it's something you feel would: definitely happen, probably happen, probably not happen, definitely not happen?*
RESPONDENTS WERE SHOWN THE FOLLOWING LIST:

The standard of living would improve

Poverty in the state would increase

Prostitution would increase

Crime would increase in the community

Pornography would be more available

There would be more incidences of family break-ups and divorces

25. *Even though you may have mentioned some of the problems on this card as definitely or possibly happening, which if any of these do you feel would become out of control or major problems, if Montana were to legalize casino gambling or other types of commercial gambling?*

Corruption in government	Organized crime
Alcoholism	Crime in your county
Drug abuse	Degeneration of the family unit
Pornography	Prostitution

26. *In which ways, if any, do you think this type of gambling might affect you or your family?*

27. *Do you feel that casino gambling and other types of commercial gambling will appeal very much, somewhat, not too much, or not at all to the people of Montana?*

28. *Do you think casino gambling and other types of commercial gambling will bring new residents to the state besides tourists?*

RESPONDENTS REPLYING "YES" IN Q. 28 WERE ASKED:

29. *Would these new Montana residents be the type of people you would want to see come to the state, or the type of people you would not want to come to the state?*

ALL RESPONDENTS WERE ASKED:

30. *Thinking for a moment about the people who now live in Montana, in which of these ways do you feel they might change if casino gambling and other types of commercial gambling are legalized in Montana?*
RESPONDENTS WERE SHOWN THE FOLLOWING LIST:

More sophisticated	Less friendly
Less family oriented	More open to new ideas
More prosperous	More concerned with money and material things
Less prosperous	

31. *If gambling were to be legalized, how popular and successful do you think it would be -- would it have a long term popularity and success, or do you think that the popularity and success of legal gambling would decrease as time went on?*

32. *All things considered, would you guess that legalized gambling would be good or bad for Montana?*

33. *Would you favor or oppose legalizing prostitution in Montana?*

34. *Would you favor or oppose legalizing marijuana in Montana?*

35. *Would you favor state or local censoring or restricting of the sale of pornographic materials or do you think that people should decide for themselves what they will buy or see?*

36. *Do you, yourself, ever gamble -- that is, play cards for money, wager on sporting events, buy lottery tickets, etc.?*

37. *Have you ever been to a gambling casino?*

38. *Apart from private gambling, such as home card games, and so forth, how much, if any, gambling do you think exists here in this community -- a great deal, some, hardly any, or none?*

39. *Here is a list of things you might see in certain books, movies, night clubs, etc. Which of these, if any, do you, personally, consider to be objectionable for yourself to see?* RESPONDENTS WERE SHOWN THE FOLLOWING LIST:

Partial nudity	Nude shows or performances
Total nudity	Find all objectionable
Sex acts between men and women	None objectionable
Homosexual acts	

OVERVIEW OF

SURVEY FINDINGS

OVERVIEW OF SURVEY FINDINGS

A large number of Montana residents believe the most important problems facing the state are high taxes, pollution and the high cost of living. However, these problems are not unique to the State of Montana and tend to be typical concerns of citizens everywhere. Perhaps more relevant to a discussion of attitudes toward legalized gambling, is the relatively large number who mention as most important the need for additional industry, improvements in the educational system, better roads and highways, or other problems of a similar nature. In addition, other problems mentioned appear to reflect concerns which may work against the acceptance of legalized gambling, e.g., overpopulation or crime and lawlessness. It is not surprising that these concerns are raised again when residents are questioned regarding the pros and cons of legalized gambling in Montana. Those problem areas most often mentioned by residents are also the ones most frequently thought to be problems the state should devote its greatest attention to, i.e., taxes, pollution and inflation. Additionally, drug abuse and welfare are perceived as problems to which the state should pay great attention. The prevailing belief is that these problems are not only important now, but will be more of a problem in the future.

Over half (55%) of the residents, including both those who voted in the November election and those who did not, reported they favor legalized gambling in Montana. Men were more likely than women to favor legalized gambling, and those under age 50 were more inclined to favor gambling than older residents. Additionally, upper income residents and those living in populated areas were more likely than others to favor legalized gambling. Finally, natives of Montana were more likely than others to support legalized gambling.

The reasons given for favoring the legalization of gambling, in general, relate to the benefits to be derived from added revenue for the state's treasury. Opposition to gambling is usually explained in terms of non-economic issues. For example, fear that it will disrupt family life, concern for the rise of organized crime in the state, or concern for an increase in political corruption.

Continued . . .

Residents are aware that gambling presently exists within their community and over half report gambling at some time themselves, which may help explain the acceptance of legalized gambling. The majority of residents believe that legalized gambling will enjoy long term popularity and success. However, opinion is evenly divided as to whether it will be good or bad for the state.

Acceptance of Types of Gambling

The forms of gambling which receive the greatest approval are those most frequently associated with fund raising activities, namely bingo and raffles. Over half of those expressing an opinion also approve of a state lottery, punch boards and pinball machines. However, with regard to other forms of gambling, less than a majority of those expressing an opinion, approve of them.

The majority who approve of bingo or raffles feel churches, lodges or civic clubs should be allowed to operate these games. Those who approve of off track betting, dog racing or jai lai most often believe they should be operated at special events, e.g., fairs or rodeos. Bars or taverns are most often named as the appropriate operators for punch boards, pinball machines and betting on sports events, while a large number feel dice, poker and slot machines should be operated by casinos.

Regulation of Gambling Operations

A large majority of residents, about eight out of ten, are in favor of strict licensing and regulation of gambling. Nine out of ten report there should be a minimum legal age established. The majority would set the legal age at 18 years -- consistent with the legal voting age; in contrast, a third would establish 21 years as the minimum legal age. Few other restrictions were

Continued . . .

Continued . . .

mentioned. Among other restrictions mentioned, about one in ten thought the amount one could gamble should be limited and approximately an equal number would prohibit welfare recipients from gambling.

Four out of ten of those interviewed thought control of licensing and enforcement should rest in the hands of the state, while one in ten thought the county government should regulate gambling. Most other residents were of the opinion that control should be shared by both state and county government. The majority of residents believe that a new regulatory agency should be formed to handle legalized gambling. Among those who thought an existing agency should handle regulation, about 40% mentioned the Attorney General's office, one in four the Department of Revenue and 13% the Board of Crime Control.

Use of Gambling Revenue

Consistent with the large number of residents who expressed concern for high taxes, three-quarters of the respondents would like to see the revenue raised by gambling applied toward the reduction of taxes. Half the residents would favor using the revenue to increase funding for education, while about one in four would return the money to local municipalities or use it for alcohol or drug abuse programs. Fewer respondents would use the revenue to fund welfare programs or compensate innocent victims of crimes.

When residents were asked to chose one alternative, other than the reduction of taxes, one third would funnel the revenue into educational programs and almost as many would return it to local municipalities. One in five would increase funding for alcohol or drug abuse programs, while relatively few chose the other alternatives.

Continued . . .

Perception of Changes Brought About By Legalized Gambling

Montana residents see a favorable change in the state as a result of legalizing all forms of gambling, particularly in terms of increased revenue and tourism. However, they also perceive some unfavorable changes in the state. The two most frequently mentioned negative effects of gambling are the fear that undesirable elements will come into the state, e.g., organized crime, and relatedly fear of a higher crime rate. In addition, over one out of five believe that increases in prostitution, crime and family disruption would definitely happen as a result of legalizing all forms of gambling. As might be anticipated, those who favor legalized gambling are less inclined than others to perceive unfavorable changes. However, regardless of their attitude toward gambling, residents generally tend to see both favorable and unfavorable consequenses as a result of its legalization.

Attitudes Toward Casino Gambling

Approximately three out of four residents feel casino gambling will have some appeal to Montana residents. However, residents tend to see many negative consequences of legalizing this form of gambling. In terms of the changes which casino gambling would bring about in Montana residents, four out of ten feel they will become more materialistic in their outlook, and one in four believe they will become less family oriented. In contrast, one in four feel residents will become more open to new ideas.

In addition, slightly more than half the respondents feel organized crime will become out of control if casino gambling were allowed. One-third are concerned that corruption in government will become out of control and almost as many hold a similar opinion with regard to the degeneration of the family. However, when asked how casino gambling will affect their own family, three-quarters report it will have no effect. Only a few feel it will bring economic benefits to their family through increased business and revenue in the state. Others feel it will create a bad environment in which to raise a family.

Continued . . .

Continued . . .

Attitudes Toward Other Issues

Despite the relatively large numbers who expressed concern for a decline in morality as a possible result of legalized gambling, a significant minority (39%) reported they favor the legalization of prostitution. Residents' attitude toward the legalization of marijuana is less favorable -- only slightly more than one in ten favor the legalization of marijuana. Generally, those in favor of legalizing both activities tend to be drawn from the same groups as those in favor of legalized gambling, i.e., men, younger residents, those in upper income households, and the better educated.

Opinion of censorship of pornographic materials is evenly divided. Slightly less than half the respondents are in favor of state or local censorship, while about the same proportion feel individuals should decide for themselves what they will buy or see. In terms of their personal standards, most residents find some aspect of sexual behavior found in books, movies, night clubs or other places of entertainment personally objectionable.

SUMMARY OF FINDINGS

PROBLEMS FACING THE STATE OF MONTANA

When asked to name, without prompting, what they thought were the most important problems facing the state, Montana residents most frequently mentioned taxes, the high cost of living and pollution. Other frequently mentioned problems which may be specifically related to the state itself were the problems of strip mining, unemployment, the state's economy and the lack of industry. A number of other problems were mentioned which, while named by relatively few, may reflect concerns which directly or indirectly affect attitudes toward gambling. For example, concern for the lack of educational facilities, the condition of roadways, overpopulation and problems associated with welfare were expressed by some residents. A small number (3%) consider gambling one of the important problems facing the state. A complete list of these problems and the proportion of residents naming each are shown in the table below.

Problem . . .	Named As Most Important %	Named As Second Most Important %	Total Mentions %
High taxes	17	9	26

Number of Interviews	(1103)	(1103)	(1103)

Some of the actual comments made are shown below:

Taxes:

High taxes for retired people; high taxes - if more employment then more tax dollars - people in state wouldn't have such a load; taxes are too high for property owners.

Inflation/High Price of Food/Food Shortage/High Prices/Cost of Living:

Prices on groceries; beef prices - shortage of meat; dollar devaluation; high cost of living, price situation.

Environment/Pollution:

Pollution; air pollution, water pollution; I think ecology of the state, preserve the wilderness, prevent pollution.

Coal Strip Mining:

Coal field, strip mining; exploitation of state's resources; coal strip development and how it affects the environment.

Continued . . .

Continued . . .

Unemployment:

Job situation - work hard to find; unemployment problem - too few jobs; there aren't enough jobs to go around.

Economy of State:

State's economic development; lack of revenue for state to spend; the economy of the state.

Lack of Industry:

In order to keep our children in the state we have to have new industry and create employment; having more industry here so we could keep more people here; no new industry, no growth, no new population.

Politics/Corruption in Government:

The political disaster that's upsetting the state.

Fuel Shortage/Energy Crisis/Lack of Power:

The fuel shortage for transportation and home heating; the national fuel shortage is effecting Montana; lack of power for industry.

Drugs:

Drugs, influence on our young people.

Population:

Too many people coming in here; too many people moving in and taking over our farmland; too many outsiders moving in.

Road System/Accidents:

Afraid highways will deteriorate due to cut backs of funding; highway needs broadening out in places; lack of speed limits, terrible roads, revenue not being put in the right places.

Education:

Educational development; modernization revenues for schools; need more educational units for technical development.

Continued . . .

Continued . . .

Lack of Water:

Drought, not enough water now to generate electricity; dryness of climate; lack of rain.

Money/Low Wages:

Shortage of money; wages should be higher.

Welfare:

Welfare; not enough jobs, people getting it who shouldn't and those who need it don't get it enough.

Gambling:

Constitution bit, where they're trying to get gambling in; gambling; the prospect of getting gambling in.

No Young Educated People:

So many students have to go out of state for employment; school is behind the times, building wise.

Sale of Land to Out of State Residents:

Control of land investors subdividing lots; taking over ranches and farms from outside the state - 45% of the land owned by outside corporations, don't like this to happen; from what I see and hear, companies coming in for profits, not caring about the people.

Residents were also shown a list of problems and asked to indicate which three problems they thought should receive the greatest attention from the Montana State government. As might be anticipated, the problems chosen tend to reflect those mentioned on an unprompted basis previously. Almost half (48%) of the respondents thought high taxes should receive the greatest attention, while about a third mentioned pollution (32%) or inflation (31%).

However, it is of interest that four out of ten (39%) reported drug abuse should receive the most attention, and a third (34%) mentioned welfare. Some issues appear to be of relatively little concern to Montana residents, fewer than 10% thought degeneration of the family, pornography, poverty, prison reform or prostitution should receive the greatest attention.

Residents'perception of the seriousness of these problems in the future also tends to reflect their current concerns. A larger proportion of citizens thought alcoholism, crime, drug abuse, taxes, inflation, pollution and welfare would be more of a problem five years from now than thought they would become less of a problem. The only problems that were inclined to be thought less likely a problem in five years rather than more of a problem were pornography, prison reform, and prostitution.

	Should Receive Greatest Attention From State	In Five Years Will Be . . . More of A Problem	Less of A Problem
Problem . . .	%	%	%
High taxes	48	30	3
Drug abuse	39	26	12
Welfare	34	18	6

POSITION ON LEGALIZED GAMBLING

The majority of Montana residents questioned are in favor of legalized gambling. About four out of ten (42%) of those interviewed reported they voted in favor of the referendum to legalize gambling in the November, 1972 election, and an additional 13% did not vote but are in favor of legalized gambling. Men are more likely than women to favor the legalization of gambling in Montana. Residents under 50 years of age, and those with a college education were more likely to favor legalized gambling than older or less well educated residents. In terms of family income, those in households with an annual family income of $7,000 or higher were more likely than lower income groups to favor gambling. Additionally, white collar workers and manual workers were more inclined to support legalized gambling than were farmers or those in the non-labor force. Finally, natives of Montana were more likely than non-natives to support legalized gambling.

Position on Legalized Gambling . . .	All Residents %	
Voted in favor in November 1972 election	42

Total	100
Number of Interviews	(1103)

The majority of residents report some gambling exists in their community (52%), while 15% report a great deal of gambling exists. One in four report hardly any or no gambling occurs in their community. The opinion that gambling is relatively widespread is reflected in the proportion who report they gamble at times(52%). In addition, a somewhat larger proportion report having visited gambling casino at some time (58%). As one might expect, those who tend to favor gambling report some personal gambling experiences more frequently than others. However, it is of interest that with few exceptions, the majority within all demographic groups report visiting a gambling casino. The most notable exception is young people, 18 to 25 years of age, less than half (40%) of the respondents in this group report visiting a gambling casino.

Extent of Gambling In Community . . .	All Residents %
Great deal	15
Some	52
Hardly any	21
None	4
Don't know	8
Total	100
Number of Interviews	(1103)

When asked why they favor legalized gambling in Montana, most answers relate to the benefits to be derived by the state through added revenue. One in four residents mention without elaboration being in favor of gambling because it produces revenue for the state, while some acknowledge the existence of illegal gambling at present and feel the state should use this existing situation to its own advantage, and others see the benefits in terms of lowering their own taxes. A small number admit to favoring gambling because they personally like to gamble (6%), while a few believe it will bring business into the state and others favor it on the grounds of individual freedom.

In contrast, the reasons given for not favoring gambling are more varied. About one in eight believe gambling will deprive families of income and almost as many see a threat from undesirable elements, particularly organized crime and professional gamblers. Others have personal or religious beliefs which oppose gambling,or feel legalized gambling will hurt the state and/or the individual in some unspecified way. A few residents fear gambling will lead to an undesirable increase in the population.

Reasons For Favoring Gambling in Montana . . .	All Residents %
Produce revenue for state: *It can be a good thing if controlled and bring in revenue; a great source of revenue for state.*	26
Since gambling already exists, state should benefit from it: *Because they're gambling anyway - might as well be brought out in open and state benefit from the licenses that they would buy; so much gambling going on in state and state isn't getting any revenue from it.*	17
May reduce taxes: *Taxation on gambling should relieve taxation on property owner; lower our taxes; I think personal property taxes would go down.*	14
Personally like to gamble: *Because I believe in it; bingo games for elderly people is fine for them - a wonderful thing; I'm a gambler; I enjoy it.*	6
Gambling should be an individual choice: *I think people ought to be allowed to have more individual rights; man should be allowed to decide for himself what is right or wrong; gambling is a person's private business; no moral issue, people should have their own choice but I'm no gambler myself.*	1

Continued . . .

Continued . . .

Reasons For Favoring Gambling in Montana . . .	All Residents %
Gambling will bring business into state: *It would bring in more people and create more work; it would bring in industry; Montana is basically without industries, would bring in a lot more opportunities.*	1
In favor but only of certain types of gambling: *Things such as lottery and other small things, not any open gambling; to legalize bingo, etc. and keep out big time gambling.*	*
Miscellaneous:	2

Reasons For Not Favoring Gambling in Montana . . .	All Residents %
Deprives families: *It takes money away from poor; I think it's an incentive for men to gamble, instead of giving the money to their families; the checks are spent on gambling instead of taking it home.*	13
Brings undesirables into state: *Mafia and organized crime; the unwanted would come into the state; because we felt it would bring in big time gambling; criminal element brought into state along with legalized gambling.*	11
Do not believe in gambling: *I don't like gambling; it isn't christian, I don't believe in it.*	6
Causes corruption: *The corruption that comes with gambling; corrupts people more than they are; it tends to lead to corruption and if legalized would lead from one thing to another.*	6
Would hurt state: *I don't like what it does to the state; I don't think it would do the state any good.*	5
Does more harm than good: *Gambling is not right, is a disease; won't do anybody any good; it would do more harm than good.*	5
Causes population problems: *Population would increase an awful lot; overpopulation of the state.*	2
Miscellaneous:	2
Don't Know	4
Number of Interviews	(1103)

Men more frequently than women favored legalized gambling because of the added revenue it would bring the state. Typical of the statements made are the following:

> *"It will bring more money into state - relieve money problems".* (Male, age 50)
>
> *"State can bring in a lot of revenue if handled in the right way".* (24 year old, married salesman)
>
> *"I think it would be a great source of revenue for the state, if they went about it right it might even lower taxes".* (A single male, age 20)

Those in middle income groups frequently mentioned that the state should benefit from existing gambling, for example:

> *"They are going to gamble anyway and the state should collect taxes".* (Said by a man with an annual income between $7,000 and $9,999)
>
> *"They're already gambling and might as well legalize it".* (A high school graduate, with an annual income between $7,000 and $9,999)

Residents with an annual family income of $10,000 or higher with children more frequently than others favored gambling because it would reduce taxes. Among the comments made were the following:

> *"I am for gambling in order to reduce high taxes".* (A married man with two children and an annual family income of $20,000 or higher)
>
> *"Save us paying taxes".* (Comment made by a man with two children and an annual income between $10,000 and $11,999)

Women were more inclined than men to feel gambling will bring in undesirables, for example:

> *"I am against it because it brings in non-desirable people".* (A 46 year old woman with 3 children)
>
> *"Afraid of people it would bring into the state".* (A 26 year old woman with 3 children)
>
> *"Brings in poor type of person around which to raise children".* (A 36 year old woman with 1 child)

Continued . . .

Continued . . .

Women were also more likely than men to oppose gambling because it deprives families. In addition, those over 50 years of age, with a grade school education or an annual income under $5,000 hold this opinion. Illustrative of their feelings are the following comments:

> *"People use slot machines instead of using money for the family, they suffer".* (A 50 year old woman, high school graduate)
>
> *"Many women with children would go hungry and the county would have to support them".* (A 78 year old, retired man)
>
> *"It will take the bread and butter from the family".* (A male with a grade school education and an annual family income between $4,000 and $4,999)

ATTITUDES TOWARD TYPES OF GAMBLING

Montana residents were asked whether they approved or disapproved of various types of gambling. Among those who expressed an opinion, nine out of ten approved of bingo and almost as many expressed approval for raffles. In addition, the majority of those expressing an opinion approved of punch boards, pinball machines and a state lottery. Opinion was about evenly divided with regard to dog racing and poker clubs, with slightly fewer approving than disapproving. With regard to other forms of gambling, a majority disapproved of them. Disapproval was greatest among those expressing an opinion about off-track betting, casino gambling and jai lai.

Type of Gambling . . .	All Who . . . Approve %	Disapprove %	Total %	Number of * Interviews	Don't know
Bingo	91	9	100	(1088)	1

* Don't know excluded from percentage base.

Among those in favor of bingo, the majority (90%) feel churches, civic clubs or fraternal lodges should be allowed to operate bingo games. Similarly, those who approve of raffles most frequently name churches, civic clubs and lodges as operators (78%). Those who approve of off track betting, dog racing, or jai lai most often mention special events such as fairs or rodeos as the places where these forms of gambling should occur. Punch boards, pinball machines and betting on sports events tend to be associated with bars or taverns, while those who approve of dice, poker clubs or slot machines tend to believe casinos or bars are the appropriate operators. Opinion is about evenly divided on the question of the appropriate operator for a state lottery.

REGULATION OF GAMBLING OPERATIONS

Among all Montana residents, four out of ten (39%) feel the state government should license and enforce gambling operations, while 11% feel the county government should do so. About as many (45%) feel licensing and enforcement should be performed by some combination of state and county governments as feel that each should have sole responsibility. Only 1% believe no formal controls should be imposed.

The majority (55%) are of the opinion that a new agency should be formed to handle the regulation of gambling in the state. About a third (36%) feel an existing agency should regulate gambling. Among those who feel an existing agency should take responsibility for regulation, 42% believe the Attorney General's office should have the responsibility, 24% feel the Department of Revenue should regulate gambling, and 13% name the Board of Crime Control as the regulating agency. Those who favor legalized gambling are somewhat more likely to name the Department of Revenue. Those opposed to legalized gambling more frequently than others name the Board of Crime Control.

	All Who Report an Existing Agency Should Be Responsible

In addition to restrictions on the age at which a person may gamble, some residents would limit the amount of money one could spend gambling (10%). Others would prohibit welfare recipients from gambling (9%), while a few mentioned keeping control within the state (3%). Some residents suggested restrictions on drinking, those with criminal records, or those caught cheating. In addition, some feel the general welfare of the family should be protected, and a few feel a time limit on gambling should be imposed.

Other Restrictions . . .	All Residents %
Limit amount of money gambled: *Have a ceiling on betting; limit the amount of money a person could lose; they should be limited on how much they can spend; not to spend their entire income on gambling; restrict people from over extending themselves; a big problem is with loans, people shouldn't be allowed to borrow money for gambling.*	10
Welfare recipients should not gamble: *Anyone on welfare shouldn't be allowed, using government money; they would have to be off welfare and support themselves; don't want welfare people to use their money.*	9
Keep control within state: *I don't feel big corporations or existing large gambling organizations should be allowed in, it should be handled by state residents; wouldn't approve of these big syndicates coming in and taking over.*	3
No drinking allowed: *No liquor allowed; no drunken gambling, only sober gambling.*	2
No one with a criminal record should gamble: *No one who has committed a felony should be allowed to gamble; criminals should not be allowed to operate gambling places; anyone operating that is a known criminal should have his license revoked.*	2
Gambling should not jeopardize families: *Men with families should be restricted; should be a penalty if a person deprives their families; shouldn't interfere with family life - shouldn't jeopardize health and welfare of family.*	1
Time limit: *Curfew on gambling at 10 P.M.; hours - when they could do it, 2:00 A.M., like the bars; shouldn't be an all night thing, time limit on it.*	1
Strict penalty for cheating: *Anyone found cheating should be barred from taking part in it; should be stiff penalty if people don't live up to the laws.*	1

Number of Interviews	(1103)

Residents with relatively high annual family incomes were more likely than others to favor restricting welfare recipients from gambling. Typical of the statements made are the following:

> *"People on welfare or relief should not be allowed to gamble".* (Mentioned by a 53 year old male with a family income between $10,000 and $11,999)
>
> *"You wouldn't want people on welfare to gamble".* (A married woman with an annual family income between $10,000 - $11,999)
>
> *"Certain people should not be allowed to gamble regardless of age, such as those on welfare".* (A 47 year old man with an annual income or $20,000 or over)

Those with moderate incomes and three or more children were more inclined than others to restrict the amount of money spent gambling, for example:

> *"Shouldn't be allowed to spend more than you have - no I.O.U.'s".* (A woman with 3 children and an annual family income between $5,000 - $6,999)
>
> *"Check to see if they could afford it, make sure they can afford it".* (A farmer with an income between $5,000 - $6,999 with 4 children)

USE OF GAMBLING REVENUE

The majority of residents feel state revenues from legalized gambling should be used to reduce taxes (75%). Half of the residents report revenue should go toward funding education, while slightly more than a fourth report revenue should be returned to local municipalities (28%) or used to fund alcohol and drug abuse programs (27%). Somewhat fewer feel the monies obtained should be used for funding welfare (17%) or compensation for crime victims (13%).

How Revenue Should Be Spent . . .	All Residents %
To reduce taxes	75
To increase or provide additional funding for education	50
Return the money to local municipalities for their own use	28
Increase or provide additional funding for alcohol or drug abuse programs	27
Increase or provide additional funding for welfare and relief	17

CHANGES RESULTING FROM LEGALIZED GAMBLING

Montana residents perceive changes which are both positive and negative in character if all forms of gambling were legalized. Opinion is about evenly divided between those who feel the changes which might be brought about are good for the state (48%) and those who feel they will not be good for the state (44%). The positive changes they perceive relate largely to improvements in financial conditions within the state. One in five feel gambling would increase state revenue, and about one in ten feel taxes would be reduced. Increase in tourism as a result of gambling is also perceived by many (16%).

On the negative side, residents expect more moral and social problems as a result of legalized gambling. Concern is expressed that gambling will bring undesirables, particularly criminals, into the state (14%) and relatedly, 13% feel the crime rate will increase. Others feel gambling will be a detriment to the state in general (8%), that corruption will increase (4%) or the family will degenerate (4%). In addition, alcoholism, moral decay and welfare problems are seen as resulting from the legalization of gambling.

Ways State Would Change	All Residents %
Positive Statements . . .	
Increase state revenue: *It would help, help revenue; I think the state would have more money to run on; good source of revenue to our state; it would be a richer state; we could accomplish more goals.*	22
Increase number of tourists: *Draw more tourists; a difference in number of tourists; it would bring an increase in tourist traffic.*	16
Reduce taxes: *Lower property tax.*	11
Bring in more money: *More people would have money; more money around; it would help general funds; more money in circulation.*	7
Create more jobs: *It might provide more work; would increase employment opportunities.*	5
Improve highways: *Make it more prosperous for highways; possibly it would do more for streets, roads.*	3
Improve education: *Should help education; it would help schools; improve education system.*	3
Provide funds for alcohol/drug programs:	1

* Less than one-half of one per cent.

Residents from manual worker households, those with a grade school education and those between 35 and 49 years more frequently than other groups mentioned increased revenue as a change resulting from legalized gambling, for example:

> *"It would bring in outside business - more people would come to the state and more revenue".* (Comment by a 37 year old woman)
>
> *"Help state collect taxes to ease burden on property owners".* (The wife of a manual worker)
>
> *"Bring a lot of money into the state".* (A 36 year old lumberjack with three children)

Residents under 35 years of age mentioned often the increased tourism resulting from legalized gambling.

> *"I think we would have more tourists".* Comment made by a 34 year old woman)
>
> *"I think it will increase the influx of tourists".* (A 24 year old male)
>
> *"A few more tourists coming in and spending more money".* (An 18 year old, unmarried male)

Young residents, 18 to 25 years of age, those with a high school education and families with 3 or more children frequently mentioned more people coming into Montana. Typical of the comments made:

> *"Bring in more people, make Montana bigger".* (Mentioned by a female high school graduate)
>
> *"Bring more people into the state".* (A married man with 3 children)
>
> *"Bring more outside people into state".* (A 25 year old women with three children)

Among the unfavorable changes perceived, those 50 years of age and older were more likely than others to mention an increase in undesirables, for example:

> *"It brings in the wrong type of people".* (Comment made by a 56 year old woman)
>
> *"We would have an influx of undesirable people".* (Mentioned by a 51 year old man)
>
> *"Different type of personality that I would not care for, same as Los Vegas".* (A 55 year old, male, insurance agent)

Continued . . .

College educated residents, those with high family incomes and those in business and professional households more often than others mentioned the possibility of a high crime rate, for example:

> *"Might be a little more crime to go along with it too".* (Statement made by a 25 year old, college educated woman)
>
> *"Mafia type organizations would take over and there would be no room for the little person".* (A retired high school teacher)
>
> *"Possibility of crime syndicate moving into the state. Might increase juvenile delinquency problem as well as overall crime rate".* (Comment by a 46 year old woman with one child and an annual family income between $15,000 and $19,999)

In addition to obtaining their unprompted views on the types of changes likely to occur if all forms of gambling were legalized, residents were questioned about six specific changes that might possibly occur. When asked the chances of the standard of living improving as a result of legalized gambling one in ten thought it would definitely happen, while 13% reported it would definitely not happen. Others took an intermediate position, however, the overall tendency is toward the view that an improved standard of living would not happen. As might be expected, those groups most supportive of gambling were more likely than others to feel the standard of living would improve. In particular, men and those under 50 years of age tend to believe the standard of living will improve as a result of legalized gambling.

While one in ten thought an improvement in the standard of living would definitely happen, about as many (13%) were of the opinion that an increase in poverty within the state would definitely happen. An additional 30% thought an increase in poverty would probably happen if all forms of gambling were legalized. Those groups most likely to be opposed to gambling, e.g., women, those over 50 years of age, low income residents, were more inclined than others to feel there was a chance that poverty would increase.

In addition, a majority of residents thought an increase in prostitution, crime and family break-ups would either definitely happen or probably happen if all forms of gambling were legalized. With regard to all three situations, over one in five reported they thought an increase would definitely happen. Slightly less than half thought pornography would become more available and about an equal proportion thought it would not become more available. Those groups most likely to be opposed to legalized gambling tend to foresee an increase in each of the situations described.

Number of Interviews	(1103)	(606)	(468)

Four out of five respondents (79%) thought casino gambling and other types of commercial gambling would bring new residents, besides tourists, to the state. However, the majority of those who anticipated new residents reported these residents would be a type they would not want to come to their state (57%). Only one in five (20%) reported the new residents would be a type they would want to see come to Montana. This response to outsiders is consistent with expressions of concern about outsiders observed earlier, and may possibly also reflect concern previously expressed that organized crime might take over gambling in the state.

Respondents tend to believe casino gambling will make Montana residents more concerned with money and material things (38%). In addition, about one in four (26%) feel residents will become less family oriented. It should be noted that among those opposed to gambling a decline in family orientation was the most frequently perceived change -- almost half mentioning it. In contrast, 25% of all respondents interviewed thought residents would become more open to new ideas.

Montana Residents Would Become . . .	All Residents %

None of the above	13	22	2
Don't know	4	4	4
Number of Interviews	(1103)	(606)	(468)

When asked what affect casino gambling might have on their family, three-quarters of the residents did not think it would have any effect. A few saw benefits to themselves either directly or indirectly through increases in business or lower taxes. Some felt it would create a bad environment for their family (5%) or contribute to the degeneration of the family (3%).

Effect on Family	All Residents
Positive Comments . . .	%
Bring more people/business: *Create more work for me - more population; it would bring more people in and create more business.*	3
Lower taxes: *Cut down on taxes; maybe lower taxes on my house.*	3
Increase income: *It would be good with the added moneys to help us.*	1
Improve opportunities for education:	1
Negative Comments . . .	
Create bad environment for family: *Think would cause us to feel more fearful and uneasy about living in the community; scared to let children go or be out; I feel we would be afraid of the outsiders such as persons on drugs and alcohol - not a good environment to raise a family.*	5
Degeneration of the family: *It would be more difficult to maintain the moral attitude within the family; it would degenerate the family.*	3
Higher crime rate: *Crime in this county; the crime rate would be higher.*	2
Raise taxes: *Make taxes go up.*	1
Contribute to alcoholism: *Would increase the drinking of my husband; alcoholism, maybe.*	1
Respondent would gamble: *Probably try it out; it would effect me, I would probably go down and gamble every night; might go to bingo once a week.*	3
Would affect family indirectly: *It wouldn't, except indirectly.*	1
Miscellaneous:	2
No effect: *Won't bother us at all; probably not any.*	74
Don't know	3

Women, young people 18 to 25 years of age and those with moderate incomes mentioned the degeneration of the family more frequently than other, e.g.:

> *"Gambling would cause disruption of family life".* (A retired man with an annual family income between $5,000 and $6,999)
>
> *"It would be a hardship on our family".* (Comment by a wife of a farmer)

Men, those between 26 and 34 years of age and residents with a college education, more frequently than others reported it would raise the economy.

> *"It would raise my standard of living".* (A 34 year old, male, college professor)
>
> *"We would benefit from it - it's going to increase real estate values".* (Comment made by a male, college graduate)

ATTITUDES TOWARD OTHER ISSUES

About four out of ten Montana residents (39%) reported they are in favor of legalizing prostitution. A much smaller proportion (12%) reported they are in favor of legalizing marijuana. Those who favor the legalization of these activities tend to be drawn from the same demographic groups who are in favor of the legalization of gambling.

Legalization of Marijuana . . .	All Residents %
Favor	12
Oppose	85
No opinion	3
Total	100
Number of Interviews	(1103)

When questioned about their position on the censorship of pornographic materials, opinion was evenly divided. Forty-eight per cent of the residents believed the state or local government should censor the sale of pornographic materials, while 47% thought people should decide for themselves what they will buy or see. However, while opinion on censorship was divided, most residents find at least some public displays of sexuality objectionable to them personally. The depiction of homosexual acts in the media or places of entertainment was most frequently judged personally objectionable. Only a small proportion (7%) reported none of the activities they were questioned about were objectionable to them.

Allowance for persons not at home was made by means of a "times-at-home" technique rather than by "call-backs". Either procedure is a standard method for reducing the sample bias that would otherwise result from under-representation in the sample of persons who are difficult to find at home. All results reported including the composition of the sample are based on data in which a "times-at-home" weighting has been incorporated. The actual number of interviews made for various population groups are reported in the findings.

THE DESIGN OF THE SAMPLE

The Gallup Organization, Inc. maintains a national probability sample of interviewing areas that is used for all *TRENDS* surveys. *TRENDS* is the Gallup "omnibus" service. For each survey, a minimum of 1,500 individuals are personally interviewed. An independent sample of individuals is selected for each survey.

The sampling procedure is designed to produce an approximation of the adult civilian population, eighteen years and older, living in the United States, except for those persons in institutions such as prisons or hospitals.

The design of the sample is that of a replicated, probability sample down to the block level in the case of urban areas, and to segments of townships in the case of rural areas. Approximately three hundred sampling locations are used in each survey. Interpenetrating samples can be provided for any given study when appropriate.

The sample design included stratification by these four size-of-community strata, using 1970 Census data: (a) cities of population 1,000,000 and over; (b) 250,000 to 999,999; (c) 50,000 to 249,999; (d) all other population. Each of these strata was further stratified into seven geographic regions: New England, Middle Atlantic, East Central. West Central, South, Mountain, and Pacific. Within each city size-regional stratum, the population was arrayed in geographic order and zoned into equal sized groups of sampling units. Pairs of localities were selected in each zone, with probability of selection of each locality proportional to its population size in the 1970 Census, producing two replicated samples of localities.

Within localities so selected for which the requisite population data are reported, sub-divisions were drawn with the probability of selection proportional to size of population. In all other localities, small definable geographic areas were selected with equal probability.

Separately for each survey, within each subdivision so selected for which block statistics are available, a sample of blocks or block clusters is drawn with probability of selection proportional to the number of dwelling units. In all other subdivisions or areas, blocks or segments are drawn at random or with equal probability.

In each cluster of blocks and each segment so selected, a randomly selected starting point is designated on the interviewer's map of the area. Starting at this point, interviewers are required to follow a given direction in the selection of households until their assignment is completed.

Interviewing is conducted at times when adults, in general, are most likely to be at home, which means on weekends, or if on weekdays, after 4:00 P.M. for women and after 6:00 P.M. for men.

Allowance for persons not at home is made by a "times-at-home" weighting* procedure rather than by "call-backs". This procedure is a standard method for reducing the sample bias that would otherwise result from under-representation in the sample of persons who are difficult to find at home.

The pre-stratification by regions is routinely supplemented by fitting each obtained sample to the latest available Census Bureau estimates of the regional distribution of the population. Also minor adjustments of the sample are made by educational attainment by men and women separately, based on the annual estimates of the Census Bureau (derived from their Current Population Survey) and by age.

SAMPLING TOLERANCES

In interpreting survey results, it should be borne in mind that all sample surveys are subject to sampling error, that is, the extent to which the results may differ from what would be obtained if the whole population surveyed had been interviewed. The size of such sampling errors depends largely on the number of interviews.

The following tables may be used in estimating the sampling error of any percentage in this report. The computed allowances have taken into account the effect of the sample design upon sampling error. They may be interpreted as indicating the range (plus or minus that figure shown) within which the results of repeated samplings in the same time period could be expected to vary, 95 per cent of the time, assuming the same sampling procedure, the same interviewers, and the same questionnaire.

The first table shows how much allowance should be made for the sampling error of a percentage:

	Recommended Allowance For Sampling Error of a Percentage In Percentage Points (at 95 in 100 confidence level)* Sample Size						
	1500	1000	750	600	400	200	100

Percentages near 60	3	4	4	5	6	8	11
Percentages near 70	3	4	4	4	6	8	10
Percentages near 80	2	3	4	4	5	7	9
Percentages near 90	2	2	3	3	4	5	7

The table would be used in the following manner: Let us say a reported percentage is 33 for a group which includes 1500 respondents. Then we go to row "percentages near 30" in the table and go across to the column headed "1500." The number at this point is 3, which means that the 33 per cent obtained

* The chances are 95 in 100 that the sampling error is not larger than the figures shown.

in the sample is subject to a sampling error of plus or minus 3 points. Another way of saying it is that very probably (95 chances out of 100) the average of repeated samplings would be somewhere between 30 and 36, with the most likely figure the 33 obtained.

In comparing survey results in two samples, such as, for example, men and women, the question arises as to how large must a difference between them be before one can be reasonably sure that it reflects a real difference. In the tables below, the number of points which must be allowed for in such comparisons is indicated.

Two tables are provided. One is for percentages near 20 or 80; the other for percentages near 50. For percentages in between, the error to be allowed for is between those shown in the two tables:

Recommended Allowance for Sampling Error of the Difference

In Percentage Points (at 95 in 100 confidence level)*

TABLE A — Percentages near 20 or percentages near 80

Size of Sample	750	600	400	200
750	5			
600	5	6		
400	6	6	7	
200	8	8	8	10

TABLE B — Percentages near 50

Size of Sample	750	600	400	200
750	6			
600	7	7		
400	7	8	8	
200	10	10	10	12

Here is an example of how the tables would be used: Let us say that 50 per cent of men respond a certain way and 40 per cent of women respond that way also, for a difference of 10 percentage points between them. Can we say with any assurance that the 10-point difference reflects a real difference between men and women on the question? The sample contains approximately 750 men and 750 women.

---

* The chances are 95 in 100 that the sampling error is not larger than the figures shown.

Since the percentages are near 50, we consult Table B, and since the two samples are about 750 persons each, we look for the number in the column headed "750" which is also in the row designated "750." We find the number 6 here. This means that the allowance for error should be 6 points, and that in concluding that the percentage among men is somewhere between 4 and 16 points higher than the percentage among women we should be wrong only about 5 per cent of the time. In other words, we can conclude with considerable confidence that a difference exists in the direction observed and that it amounts to at least 4 percentage points.

If, in another case, men's responses amount to 22 per cent, say, and women's 24 per cent, we consult Table A because these percentages are near 20. We look in the column headed "750" and see that the number is 5. Obviously, then, the 2-point difference is inconclusive.
